

UniSwap Project Report

1. Ethical Considerations

This project considers several ethical issues related to the design and use of a university-based sharing platform.

1.1 Data Privacy and Protection

UniSwap will handle personal data such as names, university email addresses, and contact preferences. To address privacy concerns:

- Only minimal personal data will be collected**
- Data will be used solely for platform functionality**
- Users will have control over their shared information**
- Data handling will follow GDPR principles**

1.2 User Safety and Misuse

As UniSwap facilitates peer-to-peer exchanges, there is a risk of misuse or unsafe interactions.

- On-campus exchanges will be encouraged**
- No precise location tracking will be required**
- Clear usage guidelines will be provided to users**

1.3 Fairness and Accessibility

The platform aims to be inclusive and fair:

- Free access for all students**
- No prioritisation based on popularity or activity**
- Accessible design principles will be followed**

1.4 Sustainability and Environmental Impact

UniSwap promotes ethical sustainability by:

Encouraging reuse of books and study materials
Reducing unnecessary waste
Supporting environmentally responsible behaviour

1.5 Academic Integrity

To prevent unethical academic behaviour:

Restricted or assessment-related materials will not be shared
Clear rules will define acceptable resource sharing

<div style="page-break-after: always;"></div>

2. Project Overview

UniSwap is a university-focused sharing platform that allows students to exchange books and study resources within their campus community. The aim is to reduce educational costs, minimise waste, and encourage collaboration and sustainability.

2.1 Group Name

Mugiwara

2.2 Team Members

Dipesh Kumar Yadav (A00038176)
Ankesh Kumar Baitha (A00032339)
Sohan Giri (A00032373)
Rabin Kumar Dahal (A00025045)
Ashikha Ambalathuveetil Ashraf (A00024513)

2.3 Sprint 1 Focus

Sprint 1 focuses on establishing the project workflow and planning:

Creating the GitHub repository
Organising tasks using a Kanban board
Defining the project idea
Identifying ethical considerations
Creating user personas

Setting up a shared Docker environment

No functional features are implemented in Sprint 1.

2.4 Planned Scope (Future Sprints)

User accounts

Book and study resource listings

Search and filtering

Resource request and exchange functionality

2.5 Project Links

GitHub Repository: <https://github.com/sohan0911/UniSwap>

Kanban Board: <https://github.com/users/sohan0911/projects/1>

2.6 Development Environment

Docker ensures all team members run the same development environment.

To start the environment:

Code

```
docker-compose up
```

<div style="page-break-after: always;"></div>

3. Code of Conduct

This Code of Conduct outlines expectations for all UniSwap project members.

3.1 Professional Behaviour

Team members are expected to:

Treat each other with respect and professionalism

Communicate clearly and constructively

Be punctual and prepared for meetings

Take responsibility for assigned tasks

3.2 Inclusivity and Respect

The team is committed to an inclusive environment:

- No discrimination or harassment**
- Respect for different opinions and perspectives**
- Equal encouragement for all members to contribute**

3.3 Collaboration and Communication

- Regular communication using agreed platforms**
- Respectful, constructive feedback**
- Collaborative decision-making where possible**

3.4 Conflict Resolution

If disagreements arise:

- Discuss issues calmly and respectfully**
- Attempt internal resolution first**
- Escalate to the module tutor if necessary**

3.5 Academic Integrity

- All work must be original and properly referenced**
- No plagiarism or academic misconduct**
- Adherence to university academic regulations**

<div style="page-break-after: always;"></div>

4. User Personas

Persona 1: Budget-Conscious Student

Name: Alex Johnson **Age:** 19 **Course:** BSc Computer Science **Year:** Year 1

Background

Alex is a first-year student struggling with the high cost of textbooks and study materials. They prefer affordable and sustainable alternatives.

Goals

Find required textbooks at low or no cost

Access study resources easily

Connect with other students on campus

Frustrations

Expensive textbooks

Limited access to shared resources

Wasting money on books used only once

How UniSwap Helps

UniSwap allows Alex to find books and notes shared by other students, reducing costs and encouraging reuse.
